

Measure 1: Impact on P-12 Learning and Development

Kansas is a state in which sharing of student data is against statute. The EPP has opted to conduct first year teacher focus groups during KWU's Homecoming weekend to measure the impact that the first year teacher has on P-12 learning and development in the schools in which they are teaching. Due to the COVID virus pandemic data collection is delayed. The data for Measure 1 are expected to become available to the public by the spring of 2022.
