

Measure 2: Indicators of Teaching Effectiveness

Kansas is a state in which sharing of student data is against statute. The EPP has opted to conduct first year teacher observations to measure specific indicators of teaching effectiveness in the P-12 schools in which they are teaching. Due to the restrictions and limitations brought on by the COVID virus pandemic data collection is delayed. The EPP plans to collect the data beginning in the spring of 2022 and data for Measure 2 are expected to become available to the public by the end of fall 2022.
